Education

VJTI <i>Bachelor of Technology in Electronics and Telecommunication</i>	Aug 2021 – 2026 <i>Mumbai</i>
Kamaladevi College of Arts, Commerce & Science <i>HSC Board</i>	Sep. 2017 – May 2021 <i>Kalyan, Maharashtra</i>
Poddar International School <i>ICSE Board</i>	Sep. 2015 – May 2020 <i>Kalyan, Maharashtra</i>
Indian School Sur <i>CBSE Board</i>	June. 2010 – Sep 2015 <i>Sur, Oman</i>

Relevant Coursework

- Blockchain dev
- Dapps
- React
- Frontend Development
- IPFS

Experience/Internships

Mon-Studios <i>Community Moderation</i>	January 2024 – December 2025 <i>Remote</i>
• Assisted community members with Web3, NFTs, and blockchain-related inquiries, offering guidance and information. • Provided support to users by assisting in bug fixes and troubleshooting issues. • Moderated community forums , ensuring adherence to community guidelines.	
BlockSeBlock <i>Smart Contract Developer Intern</i>	May 2024 – July 2024 <i>Remote</i>
• Developed insurance decentralized application (dApp) on Internet Computer Protocol (ICP) blockchain infrastructure. • Implemented smart contract functionality and user interface components for insurance-related transactions and claims processing. • Collaborated with development team to integrate Web3 technologies and optimize dApp performance on ICP network.	
GC Chronicles <i>Content Creation</i>	June 2024 – August 2024 <i>Remote</i>
• Developed and executed promotional strategies for brands in the Web3 ecosystem, using expertise in blockchain to craft accurate and engaging content. • Created educational content about blockchain technologies, DeFi protocols, and emerging Web3 trends for diverse audiences. • Collaborated with marketing teams to produce compelling narratives that effectively communicated complex blockchain concepts to mainstream audiences.	

Projects

MediBlock –Blockchain-Medical Data Storage <i>CSS, JavaScript,React.js,Tailwind, IPFS services(Pinata), JSX, Solidity</i>	
* MediBlock is a blockchain-based platform designed to secure and manage medical data through decentralized storage and smart contracts. * The platform empowers patients with control over their records and ensures transparent access logs, integrating technologies such as React.js, IPFS, and Solidity.	
Wine Quality Predictor – Machine Learning Project <i>Python, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn</i>	
* Developed a machine learning model to predict wine quality based on chemical attributes like acidity, alcohol, sulphates, and pH levels. * Performed data preprocessing, exploratory data analysis, and applied models like Random Forest and Logistic Regression. * Achieved over 80% accuracy, aiding potential automation in wine quality inspections.	
SecureLeap – Blockchain Security Platform <i>Rust, Next.js, Web3.js, Node.js, Evm compatible icp chain, Smart Contracts</i>	
* Developed a decentralized application (dApp) focused on blockchain security and secure transactions in a trustless environment. * Implemented smart contract security protocols and cryptographic mechanisms for enhanced data protection and integrity. * Built user interface with React.js and integrated Web3 functionality for seamless blockchain interactions and transaction validation.	

Technical Skills

Languages: Python, Java, C++ , HTML/CSS, JavaScript, JSX, Solidity, Yul

Developer Tools: VS Code, Remix, Hardhat , Matlab , Ltspice, Docker, Foundry

Technologies/Frameworks: Linux, GitHub, React, Tailwind, IPFS

Leadership / Extracurricular

VJTI Google Developer Student Club

2023

Blockchain Core Team Member

VJTI

- * Contributed as a core team member in organizing and hosting blockchain-related events and workshops.

Technovanza Ideathon

contributor

VJTI

- Runner-Up in Blockchain Domain
- Participated in the Technovanza Ideathon and secured the runner-up position in the blockchain domain

Community of Coders ETh VJTI

Present

Eth VJTI Core Team Member

VJTI

- Contributed as a core team member in organizing and hosting blockchain-related events and workshops , projects and representing VJTI on Ethereum Community .

Code Shastra Hackathon Qualifier

2023

Contributor

VJTI

- Participated in a 48-hour hackathon, Code Shastra, hosted by DJ Sanghvi, where I developed solutions under intense, real-time coding conditions, refining my skills in problem-solving and innovation.
